

## EUROMAP Press Release

### Exhibitors from Europe present themselves at Chinaplas 2025

**November 07, 2024** – There are still five and a half months to go until Chinaplas 2025 opens its doors in Shenzhen on 15 April next year. It is roughly halfway to the K-show next October. China remains one of the most important sales markets worldwide for European plastics machinery manufacturers, alongside Europe and the USA. The members of the umbrella organisation of European manufacturers of plastics and rubber machinery EUROMAP, sponsor of the event organised by Adsale since the early 1980s, are looking forward to this trade fair with great anticipation. The EUROMAP partners will once again be represented at the trade fair with national pavilions from Germany, Italy, Austria, Switzerland and the UK and with numerous exhibitors. The German joint participation alone will feature 80 exhibiting companies and 20 sub-exhibitors on an area of 3,000 square metres.
